

## Hammerhead - bullet proof

Hammerhead is a bullet and vandal resistant lighting fixture, particularly useful for remote areas where a high degree of unsupervised public traffic or crimes are committed under the cover of darkness. The fixture, fabricated of high-strength material, features our exclusive U-Veil glass and bullet resistant lens. It can be pole or wall mounted. Specially designed poles increase the total system security in isolated areas.

We have successfully completed several solar projects in Africa and Asia in different countries.

### Features:

- Solar or grid powered
- LED lights are available
- Pole or wall mounted
- Custom designed if required
- Bullet and vandals proof.
